Mobil DTE™ 20 Ultra Series

Mobil Industrial , Switzerland Hydraulic Oils

Product Description

Mobil DTE™ 20 Ultra Series oils are high performance anti-wear hydraulic oils with extended oil life capabilities and have demonstrated up to 2 times longer oi intervals versus similar competitive oils (*).

They meet the stringent requirements of hydraulic systems using high pressure, high output pumps as well as other hydraulic system components such as close clear servo-valves and numerically controlled (NC) machine tools. The products exhibit outstanding oxidation and thermal stability allowing long oil life and minimized c formation in harsh conditions and with severe hydraulic systems using high pressure, high output pumps. The keep clean performance protects critical hydraulic systems components from malfunction, such as tight tolerance servo and proportional valves found in many modern hydraulic systems.

These products met the most rigorous performance requirements of a wide range of hydraulic system and component manufacturers, allowing use of a single p with excellent performance characteristics.

(*) with a viscosity index around 100 and a zinc-based anti-wear system - meeting at least ISO 11158 (L-HM) and/or DIN 51524-2 (HLP type) requirements.

Features and Benefits

| Features | Advantages and Potential Benefits | | | | |
|---|--|--|--|--|--|
| Outstanding Keep Clean Performance | Reduced system deposits and sludge to help protect equipment and extend equipment life, reduce maintenance costs improve total system performance | | | | |
| Enhanced Anti-wear Performance | Meets or exceeds major pump manufacturer requirements, helps extend component life | | | | |
| Exceptional Thermal and Oxidation Stability | Helps reduce maintenance downtime and costs by contributing to system cleanliness and deposit reduction even uncoperating conditions and high power density. | | | | |
| Enhanced Corrosion Protection | Helps ensure protection with a wide variety of component metallurgy | | | | |
| Controlled Demulsibility | Protects systems from small and large quantities of water and helps extend filter life | | | | |
| Quality Reserve | Maintains performance features even under severe service conditions and extended drain intervals | | | | |

Applications

- Hydraulic systems critical to deposit build-up or where sludge and deposits form with conventional products
- · Hydraulic systems requiring a high load-carrying capability and anti-wear protection, and when thin oil-film corrosion protection is an asset
- Where small amounts of water are unavoidable
- Systems containing gears and bearings
- Machines employing a wide range of components using various metallurgy
