Mobil Industrial , Denmark

Gas Engine Oil

# Product Description

Mobil Pegasus<sup>™</sup> 710 is a premium performance gas engine oil primarily intended for the lubrication of modern high-speed four-cycle engines where oil consumptivery low. These engines are generally of the lean-burn design where increased manifold pressures prevent sufficient lubricant from getting into the valve guide area oil is also recommended for the lubrication of gas compressors. It is formulated from high quality mineral base oils and an advanced medium ash additive s designed to provide excellent protection of engine and compressor components. It exhibits a high level of chemical stability and resistance to oxidation and nit Pegasus 710 offers outstanding resistance to valve train wear and protection against deposit formation. These performance advantages combined with its very ef detergency and dispersancy system control the formation of ash and carbon deposits that could result in poor engine performance and detonation.

Its high reserve alkalinity and TBN retention also makes it suitable for engines operating on fuels that contain low amounts of corrosive materials such as hyc sulphide. The excellent anti-corrosion properties prevent corrosive wear in cylinders, valve areas and bearings resulting in longer engine life. Mobil Pegasus 710 ant and anti-scuff performance assures minimal piston scuffing, scoring and cylinder and ring wear.

#### Features and Benefits

Mobil Pegasus 710 Gas Engine Oil provides cleaner engines, lower wear rates and improved engine performance. The use of this product will result in re maintenance costs and improved production capacity. Their excellent chemical and oxidation stability results in longer drain periods and reduced filter costs. Th reserve alkalinity of this product allows its use in engines operating on fuels with low amounts of corrosive materials in the fuel gas.

Features	Advantages and Potential Benefits
Outstanding Anti-wear and Anti-scuff Properties	Lower wear of engine components Reduced scuffing of liners of highly loaded gas engines Provides excellent break-in protection
High Oxidation and Chemical Stability	Cleaner engines Extended drain intervals Reduced filter costs Excellent resistance to oxidation and nitration
Innovative Medium Ash Formulation	Protects valve seats and faces on four stroke-cycle engines Controls combustion chamber ash formation and improves spark plug performance
Excellent Corrosion Resistance	Reduces valve guide wear in four stroke-cycle gas engines Protects bearings and internal components
Exceptional Reserve Alkalinity	Controls formation of acids in the oil Protects engine components from acidic attack

#### Applications

- · Spark ignited four-cycle gas engines with very low oil consumption
- Engines experiencing valve train wear and corrosion
- · Engines operating on fuel containing low levels of sulphur and chlorine compounds
- Reciprocating compressor cylinders compressing natural gas
- High output or ambient rated engines operating at or in excess of rated capacity under high temperatures

## Specifications and Approvals

#### This product has the following approvals:

INNIO Waukesha Engine Cogeneration / Gas Compression Applications Using Pipeline Quality Gas

Rolls-Royce Solutions Augsburg (former MTU Onsite Energy) Gas Engines Series 400 - all engines with biogas, sewage gas and landfill gas

## MAN M 3271-4

INNIO Jenbacher TI 1000-1109 (Class B fuel gas, Type 2 & 3)

MAN Energy Solutions Augsburg (Heritage MAN B&W) 4 Stroke medium speed engines for LNG operation

GUASCOR All natural gas engine model types (except 86EM and 100EM)
